this book brings together state of the art advances in intelligent data analytics as driver of the future evolution of pae systems in the modern power and energy pae domain the increasing penetration of renewable energy sources res and the consequent empowerment of consumers as a central and active solution to deal with the generation and development variability are driving the pae system towards a historic paradigm shift the small scale diversity and especially the number of new players involved in the pae system potentiate a significant growth of generated data moreover advances in communication between iot devices and m2m machine to machine man to machine etc and digitalization hugely increased the volume of data that results from pae components installations and systems operation this data is becoming more and more important for pae systems operation maintenance planning and scheduling with relevant impact on all involved entities from producers consumer s and aggregators to market and system operators however although the pae community is fully aware of the intrinsic value of those data the methods to deal with it still necessitate substantial enhancements development and research intelligent data analytics is thereby playing a fundamental role in this domain by enabling stakeholders to expand their decision making method and achieve the awareness on the pae environment the editors also included demonstrated codes for presented problems for better understanding for beginners

maintaining the substance that made introduction to the thermodynamic of materials a perennial best seller for decades this sixth edition is updated to reflect the broadening field of materials science and engineering the new edition is reorganized into three major sections to align the book for practical coursework with the first thermodynamic principles and second phase equilibria sections aimed at use in a one semester undergraduate course the third section reactions and transformations can be used in other courses of the curriculum that deal with oxidation energy and phase transformations the book is updated to include the role of work terms other than pv work e g magnetic work along with their attendant aspects of entropy maxwell equations and the role of such applied fields on phase diagrams there is also an increased emphasis on the thermodynamics of phase transformations and the sixth edition features an entirely new chapter 15 that links specific thermodynamic applications to the study of phase transformations the book also features more than 50 new end of chapter problems and more than 50 new figures

this book gathers together a set of chapters covering recent development in optimization methods that are inspired by nature the first group of chapters describes in detail different meta heuristic

algorithms and shows their applicability using some test or real world problems the second part of the book is especially focused on advanced applications and case studies they span different engineering fields including mechanical electrical and civil engineering and earth environmental science and covers topics such as robotics water management process optimization among others the book covers both basic concepts and advanced issues offering a timely introduction to nature inspired optimization method for newcomers and students and a source of inspiration as well as important practical insights to engineers and researchers

calvinist determinism destroys moral responsibility and makes god the author of sin these two accusations are not new and were arguably anticipated by paul in romans 9 but they remain today the most important objections offered against calvinist determinist views of human free will this book is a philosophically rigorous and comprehensive defense of calvinism against these two families of arguments with respect to human moral responsibility it discusses whether determinism destroys free will turns humans into pets or puppets and involves or is analogous to coercion and manipulation it responds to the consequence argument and direct argument for incompatibilism the principle of alternate possibilities the ought implies can maxim and related claims with respect to the authorship of sin it discusses whether calvinist determinism improperly involves god in evil does it mean that god sins or causes sin or wills sin in problematic ways does god intend our sin or merely permit sin in each case the coherence of the calvinist view is defended against its most potent objections to reject the claim that calvinism is excusing sinners and blaming god
